The Submersible Wastewater Pump Association (SWPA) is a national trade association representing and serving the manufacturers of submersible pumps for municipal and industrial wastewater applications. Founded in 1976, the association’s primary focus is on industry guidelines, education and promotion.

The Number One Training Resource In the Industry for Submersible Wastewater Pumps

“Ask the Experts”

Industry Leading Training

Earn Continuing Education Credits

Co-Sponsored by Pumps & Systems
About the Program
For over two decades, SWPA has been providing unmatched, one-of-a-kind educational programs giving attendees the opportunity to interact with dozens of SWPA Member Industry Experts while tapping into their extensive experience and wide-ranging expertise. This unique two-day session combines our two highly successful training programs into one comprehensive two-day forum. Day one will be a general session for all attendees. Day two will break out into two separate tracks... Pumps Systems Training and Controls Training. For those of you who are looking to the next level in training, we offer “200 Level” training courses and various Hands-on courses.

Who Should Attend?
Consulting Engineers, Designers, Specifiers, Users, Distributors, Reps, Product Managers, Technical Managers, Engineering Managers, Sales & Marketing Managers, Product Specialists, Wastewater Operations & Service Personnel and anyone else with an interest in the use and design

Keynote Speaker
Tom Decker, Former Vice-President at Brown and Caldwell
