ABOUT THE ACTIVITIES DURING OUR SUMMER MEETING

OUR COMMITTEE MEETINGS AND PLANT TOUR WILL BE HELD AT THE NEW
GRUNDFOS AMERICA HEADQUARTERS.

The new 48,670 sq. ft building was designed based on the United Nations Sustainable Development Goals #6 on water and #13 on climate in alignment with Grundfos’ goals to lower carbon emissions and minimize waste. In 2022, it was LEED certified v4 Platinum and is the first in Texas to receive this certification.

The building is fully electric, uses no fossil fuels, and instead relies on solar energy, natural light, and energy-efficient equipment. Also, less than 13% of the water usage is sourced from the local municipal system. Nearly a million gallons of water are collected annually from rainwater and the hydronic HVAC system.

69TH STREET WASTEWATER TREATMENT PLANT

The City of Houston manufactures a fertilizer product from the Sludge Processing Facility area of the 69th Street Wastewater Treatment Plant.

The manufacturing process involves the sterilization, dewatering, oven drying, pelletizing and storage of waste sludge into fertilizer.

DINNER & EVENING ACTIVITIES ON JULY 29TH

SWPA and Zoeller will be hosting a fun-filled evening at Pop Stroke Golf.

SWPA will have a private room, buffet dinner, ice cream and all you can golf at this incredibly fun facility.
